- Roller discharge conveyor

industrial shrink wrapping offers these important benefits

- Produces Strong, Unitized Packages
- Provides Total Protection Against Dust, Moisture and handling
- Facilitates Identification
- Reduces Inventory of Shippers
- Cuts Shipping Costs
- Makes Possible Immediate Product Display

model 1205 tray pak bundling system

To satisfy packagers' requirements for an economical sleeve wrap system, Weldotron provides a low-price semi-automatic wrapper.

Designated Model 1205, this economy Tray Pak Bundling System offers many of the same quality features found on other units in the Weldotron industrial packaging line.

The 1205 is equipped with the unique Dynaband sealing system for wide, quality seals with the heaviest gauges of shrinkable films. Precise temperature, seal and dwell time controls allow the packager to select the proper combination for superior seals with each type of available film.

In addition to these features, the Model 1205 also includes an automatically powered sealing bar, roller infeed and outfeed conveyor and a fully adjustable hand-powered pusher assembly.

Specifications

SHIPPING DIMENSIONS:	56" L. x 59" W. x 86" H.
WEIGHT:	1200 lbs.
ELECTRICAL REQUIREMENTS:	230 V., 1 phase, 60 cycle, 6 amps continuous, 40 amps during sealing pulse.
