

weldtron®**SEMI AUTOMATIC INLINE CONSOLE L-SEALERS**

The 5300 series is a family of heavy duty, production L-sealers that combine inline product feeding with push button pneumatic sealing and automatic package discharge conveyor. Inline product feeding facilitates the handling of large, oversized products while push button sealing and powered product take-away reduce operator fatigue and increase productivity.

5300 series features include a new powered surface film unwind with automatic film braking to

prevent film over-travel. Impulse sealing, adjustable temperature control and automatic cycle timing provide the adjustability required for optimum performance with all types of shrink film.

Other standard 5300 series features include pneumatic hole punch, stainless steel loading tray, and an adjustable film inverting plow. Highest quality components and a heavy duty, caster-mounted, steel console frame ensure years of dependable performance in continuous production environments.

**Model 5311**

5300 SERIES FEATURES:

- Inline Product Feed
- Powered Surface Film Unwind
- Push Button Operation
- Pneumatic Sealing
- Automatic Package Discharge
- Automatic Cycle Timing
- Adjustable Heat Control
- Seal Temperature Compensator
- Stainless Steel Loading Tray
- Quick Conveyor Height Adjustment
- Handles All Shrink Films
- Heavy Duty Construction
- "Steel-It" USDA Approved Epoxy Paint Finish

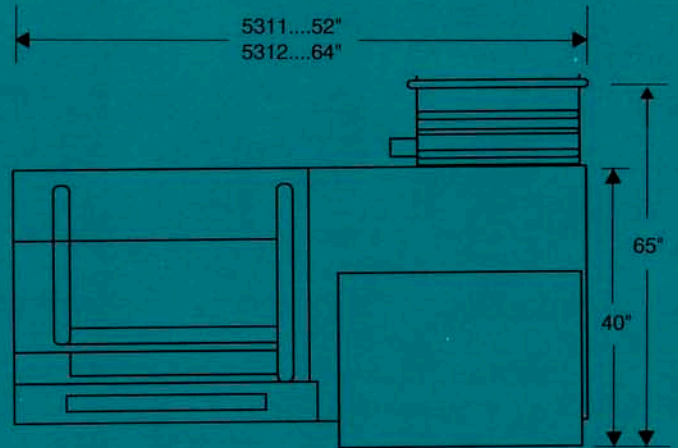

OPTIONAL ACCESSORIES:

- Film Microperforator
- Vacuum Scrap Removal Systems
- Additional Film Inverting Plows
- Cushioned Start Conveyor To Prevent Product Shingling
- Whiteline Finish For Food Applications
- Spare Parts Kits

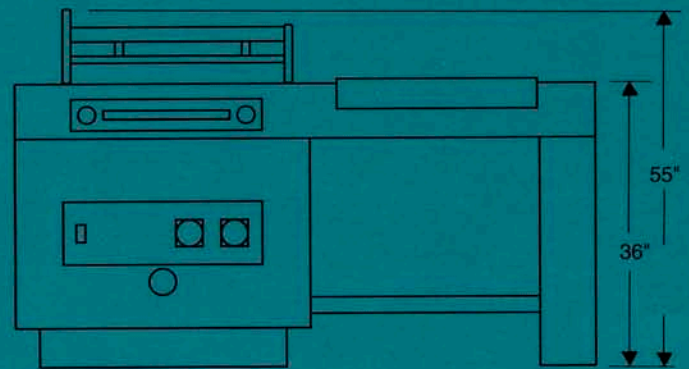

SPECIFICATIONS:

Model #	Seal Dim. W X L X H	Max. Film Width	Power		
			Volts	Amps	Ph.
5311	20" x 16" x 6"	24"	230	25	1
5312	20" x 28" x 6"	24"	230	30	1

Air requirement: 14 CFM @ 80 PSI free air
